## **Who are DFA ?**

=DFA=(Death from Above) is a team of individuals who play the flight simulations DCS:Black Shark and Lock-On Modern Air Combat with the Flaming cliffs 2.0 expansion.

DFA use mostly Close Air Support(CAS) aircraft such as the KA-50 Black Shark attack helicopter, A-10A Thunderbolt II and the Su25/Su25T Frogfoot Fixed wing attack aircraft and have alot of game time in these particular planes.

Our members are mostly experienced virtual pilots/real world pilots from the United States,Canada and Europe.

We use some brevity codes when flying to enhance the realism experience but this isnt considered essential for new recruits as they will pick it up as they fly with us.

Please note we are currently not recruiting.

=DFA=Washout/Commanding Officer
